

SUALSA

• RUG & CARPET COLLECTION •

SUALSA es sin duda el referente en la fabricación de alfombras en España.

Una empresa que ha sabido mantener y aumentar su prestigio en el sector gracias a un equipo propio de diseño que le permite mantener un liderazgo en los estilos y colores de mayor actualidad, tradicionales, o proyectos personalizados para atender cualquier demanda.

Una maquinaria informatizada de última generación y una red comercial capaz de cuidar con esmero cada una de las zonas de todo el país y de cualquier parte del mundo, dan a esta empresa un sello de identidad único.

La disposición de servicio en toda la cadena de producción, desde laboratorio, tintorería, embobinado... junto a los más estrictos controles de calidad, son una auténtica garantía para todos nuestros clientes.

SUALSA is a leading name in rug manufacturing in Spain.

Over the years, we have learned how to maintain and increase our prestige in the trade thanks to an in-house design team that gives Sualsa greater market appeal, with up-to-date styles and colours, or more traditional versions, and even customized projects intended to satisfy specific customer demands.

Our state-of-the-art computer-controlled machinery and sales network capable of attending to every last detail in all areas of Spain and far beyond our borders have given Sualsa the distinctive identity we are proud of today.

And our commitment to service all the way through the production chain –from lab to dyeing to weaving, and of course our rigorous quality control– are all part of the total guarantee our customers always enjoy.

ANTI-DESLIZANTES PARA ALFOMBRAS

- PERMANENTEMENTE EFECTIVOS
- PROTEGEN SUS ALFOMBRAS
- FÁCILES DE CORTAR
- RESISTENTES A LA DEFORMACIÓN
- PUEDEN UTILIZARSE SOBRE SUPERFICIES CALEFACCIONADAS

La trama anti-deslizante impide a alfombras, tapices y pasillos moverse sobre cualquier superficie, en especial sobre los pisos lisos tales como parquet, vinilos, piedra, linóleo o cerámica. La cera, la suciedad, el polvo, etc. reducen el efecto anti-deslizante. Para devolverle su eficacia, se pueden lavar a mano con agua tibia y jabón o usar detergente suave, en máquina lavadora a temperatura de 60°. El lavado puede repetirse todas las veces que sea necesario.

MANTENIMIENTO Y LIMPIEZA

S
U
A
L
S
A

LIMPIEZA

Cuando adquirimos una alfombra de fibra natural (100% lana), en los primeros días observaremos que sueltan algunas hebras (pelusa) y que a medida que la vamos pisando van desapareciendo. Se trata de un proceso natural debido al corte del hilo o hebra, que hace que las fibras sueltas no se adhieran a la base.

Se recomienda la limpieza a fondo, como mínimo, una vez al año. Puede utilizarse una tela de tal forma que sea cual fuese el líquido empleado como producto de limpieza, se transmita sólo la humedad a la alfombra, procurando no empaparla nunca. Se dejará secar durante varias horas. Es importante que la alfombra no sea pisada hasta que una vez seca se cepille. Para la limpieza deberán emplearse detergentes neutros, se aconsejan los de espuma seca.

NUNCA DEBERÁN EMPLEARSE

Bencina: por ofrecer peligro de incendio

Amoniaco líquido: porque destruye los colores.

Jabón: por ser alcalino

Detergente alcalinos: porque atacan la alfombra.

Cuando se manche la alfombra conviene extraer lo más rápido posible el líquido absorbido. Se utilizará una tela de algodón absorbente o un papel secante para eliminar la mayor cantidad posible de líquido derramado. Si la mancha es fuerte y ha penetrado en el interior de la alfombra, conviene colocar una materia absorbente debajo de la misma.

CONSERVACIÓN

Se aconseja durante los primeros meses un ligero cepillado con una escoba blanda (nunca con cuerpos duros). Se observará durante esta limpieza, que la alfombra pierde algo de pelusa: ello es consecuencia natural del obligado tundido de la misma durante el proceso de fabricación, por tanto es normal que ocurra.

Puede que algunos hilos sobresalgan de la superficie del pelo, en ese caso no tire de ellos, córtelos con unas tijeras y déjelos al mismo nivel que el resto del pelo.

Después se verificará un barrido diario siempre en la dirección del pelo y una pasada de aspirador semanal no muy fuerte.

Se recomienda durante los dos primeros meses no utilizar el aspirador ni ningún producto de limpieza.

Dos primeros meses solamente un ligero cepillado o barrido.

Meses sucesivos: cepillado-aspirador.

Al año: cepillado. Limpiar con aspirador. Aplicar producto de limpieza. Secar. Cepillado. Aspirado

MAINTENANCE AND CLEANING

CLEANING

We recommended a thorough cleaning at least once a year. Can be used a cotton cloth so that whatever, the liquid employed as a cleaning agent, humidity is transmitted only to the carpet, begin careful no soak ever. Keep drying for several hours. It is important that the carpets in not used until it is totally dried, and after dry you should brush it.

For cleaning should be used neutral detergents, are advised of dry foam.

SHOULD NEVER BE USED

Petrol: by providing fire hazard.

Liquid ammonia: because it destroys the colors.

Soap: as alkaline.

Alkaline detergents: because attack the carpet.

When staining the carpet should be removed as quickly as possible the liquid not absorbed. It will be used an absorbent cotton cloth or paper towel to remove as much spills liquid as possible. If the stain is strong and has penetrated into the carpet, we recommend to place an absorbent material below it.

CONSERVATION

Advised during the first months a light brushing with a soft broom (never hard ones). It will be noted during this cleaning, the carpet loses some lint: it is a natural consequence of the forced shaving of it during the manufacturing process, so it is normal that this happens.

Some strands may protrude from the surface. In that case, don't pull them, cut them with scissors and leave the same level as the rest of hair surface. After a scan is checked daily always in the direction of hair and a vacuum cleaner once a week not very strong. It is recommended during the first two months do not use the vacuum cleaner or any cleaning product.

First two months: only a slight brushing or sweeping.

Following months: brushing-cleaner.

Year: brushing. Clean with vacuum cleaner. Apply cleaner. Dry. Brushing. Vacuum
